

# Enjoy-365

Behind the wheel  
of a new adventure

Comfortable driving position, fast operation, strong structure

 **FIMAP®**  
*Italian customized cleaning*

# Enjoy-365

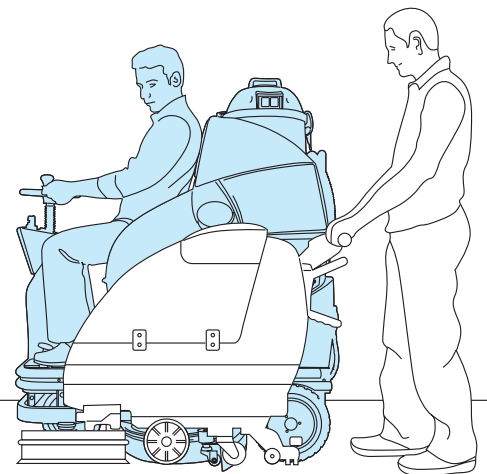

## Enjoy-365

is a ride-on scrubbing machine that is as small as a walk-behind machine.

Thanks to this feature, half of the effort and twice the productivity are ensured even where, today, only walk-behind machines could pass

Enjoy-365 is extremely compact.

This small scrubbing machine, with working capacity up to 3950 m<sup>2</sup>/h, is especially suitable for maintenance and thorough cleaning tasks that are usually performed with walk-behind scrubbing machines in highly congested areas, such as offices, supermarkets, schools, private and public hospitals etc..

# Enjoy-365

is more comfortable, faster, with longer autonomy,  
easier to transport,... more productive

## Enjoy-365 improves operating quality!

Operators can work completely relaxed thanks to speed adjustment and automatic drive system.

**Enjoy-365 is provided with automatic kit:** when the squeegee switch is set to "automatic" and forward gear is selected, the squeegee is lowered and suction starts. In addition to that, when lowering the scrubbing head, with the machine in the operating position, the brushes start rotating and water starts flowing. Vice-versa, when reverse gear is engaged, the squeegee is lifted and water flow is interrupted. Suction and brushes, instead, continue to operate to ensure perfect drying.

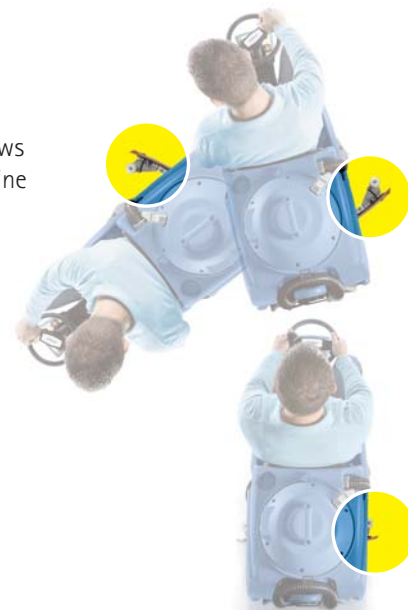

## Enjoy-365 is fast!

Indeed, it is twice as fast (6 km/h) as traditional scrubbing machines

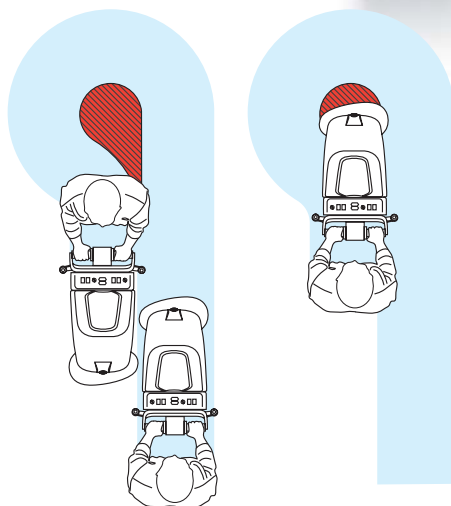

## Enjoy-365 ensures perfect drying!

The parabolic squeegee follows the movements of the machine and ensures excellent drying also on bends

1ST PASS

2ND PASS

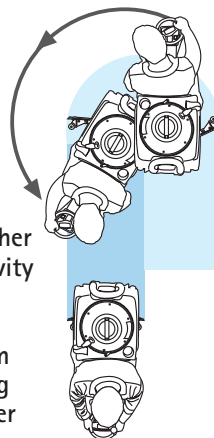

Floor area that is cleaned with traditional scrubbing machines

SINGLE PASS

10% higher productivity

160 cm Turning diameter

Cleaned floor area with Enjoy-365

## Enjoy-365 is more productive on bends!

Its tight turning diameter (160 cm) increases productivity by 10%.

It cleans larger floor areas compared to other scrubbing machines.

Enjoy-365 is provided with speed reduction system on bends which ensures excellent machine control and better scrubbing performance

**Enjoy-365 has excellent operating autonomy!**  
 Endless run time is ensured by easy interchangeability of the batteries that can be replaced at any time avoiding machine downtimes

**Enjoy-365 has really capacious tanks!**  
 PIT-STOP times for this scrubbing machine are cut by half thanks to its tanks with 30% greater capacity than competing scrubbing machines that are currently available on the market

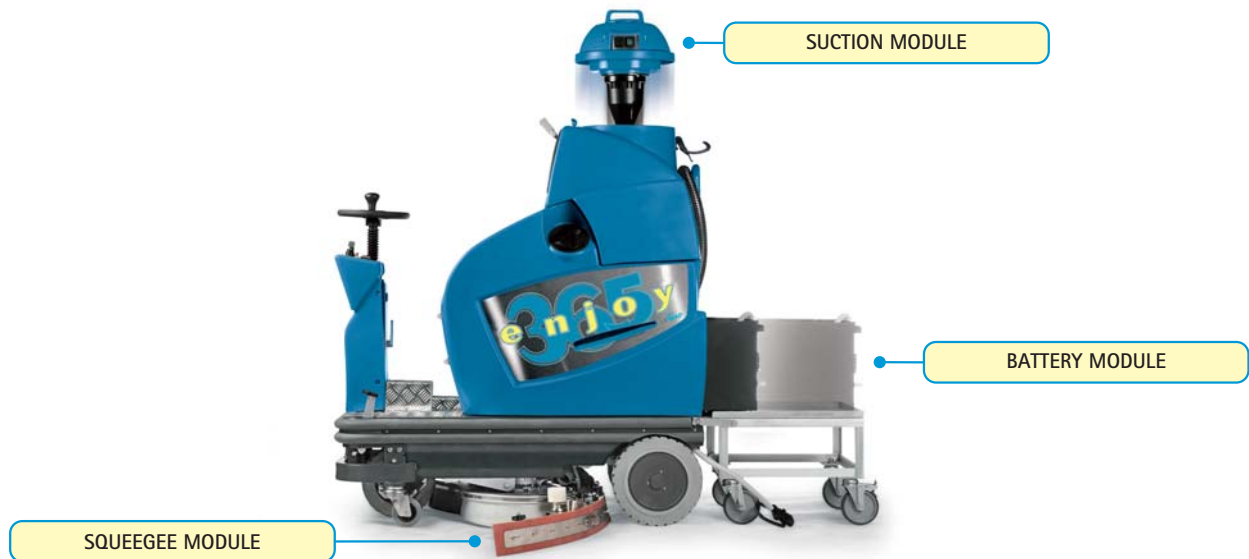

**Enjoy-365 features excellent transportability!**  
 Thanks to its 79 cm cleaning width including the squeegee, it can easily go through traditional doors and standard elevators without removing any component

# Enjoy-365

## is modular: simple daily maintenance can reduce costs considerably

Enjoy-365 features the original modular system patented by Fimap!  
This system ensures reduced machine downtime thanks to fast component replacement without requiring any skilled technician.  
That's why maintenance costs can be reduced

- Easy recovery tank emptying and sanitization through the large opening

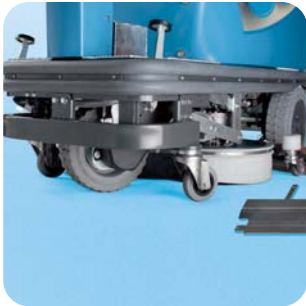

- Trouble-free suction filter cleaning thanks to easy removability. Removing the suction head at the end of each working day prolongs its life cycle by 30% as contact with detergent solution is prevented

- To ensure efficient suction performance, clean the suction hose regularly with a jet of water

# Enjoy-365

## is a safe and reliable scrubbing machine

### Enjoy-365 complies with European safety standards!

The 5 wheels of Enjoy-365 are patented and ensure perfect driving stability under any operating condition

A strong bumper protects the drive-wheel. Thanks to rubber bumpers and side protection bars, Enjoy-365 is protected from accidental impacts

The scrubbing head structure ensures perfect stability and longer motor life compared to the other scrubbing machines on the market

All metal components of the machine underwent rust-proof treatment so that 30% longer life is ensured

### Enjoy-365 improves cleaning quality also in areas with many obstacles!

Brush pressure can be adjusted up to 50 kg in order to remove the most stubborn dirt. Thanks to its size - as small as a walk-behind machine - it is extremely manoeuvrable around any obstacles, even in narrow spaces

## Enjoy-365 is an extremely compact scrubbing machine

## Enjoy-365 is available in the following version

**PROFLine**

TECHNICAL DESCRIPTION		ENJOY-365 
Electromagnetic compatibility – Emission standard		EN 61000-6-3 (2002)
Squeegee width	cm	79
Brushes Ø (n.)	mm	345 (2)
Brushes motor	V/W	24/750
Brushes rpm	rpm	160
Brushes pressure	kg	fino a 50
Suction motor	V/W	24/550
Suction Vacuum	mBar	120

TECHNICAL DESCRIPTION		ENJOY-365 
Traction motor	V/W	24/400
Type of drive		electronic aut.
Forward speed	Km/h	0÷6
Max gradient at full load	%	10
Turning diameter	cm	160
Batteries (n.)	V/A	6/240 (4)
Batteries weight	kg	130
Machine weight (without batteries)	Kg	236
