

KSANEX

KSANEX Equipment for sanitizing small environments

 **FIMAP®**

KSANEX

KSANEX is intended for indoor atomization of sanitizing products. The product is atomized to guarantee long lasting and evenly spread effect in the air so that it reaches and sanitizes all surfaces. With **KSANEX** also air-conditioning systems can be sanitized both when operating and when switched off. The low pressure that is used for atomization prevents any mechanical damage which may occur with violent jets of compressed air.

It's simple and easy for everyone to use.

KSANEX is part of Fimap's line of sanitizers that help to raise the level of hygiene in any environment.

The machine is equipped with an autonomous air compressor and an exclusive dispensing gun where the product is mixed with the air and then distributed in the environment.

It is compact and easy to transport, therefore suitable for sanitizing any environment:

offices, gyms, schools, day centres, canteens, bars, restaurants, shops or means of transport.

Machine internal components are easily accessible for filling the disinfectant solution and for simple maintenance. The machine is equipped with an autonomous air compressor

The exclusive dispensing nozzle is the point where the solution mixes together with the air. This is a key point of the machine, thanks to the choice of a large and easy-to-press lever, **KSANEX** can be used for long shifts without fatigue

The 10 m power cable allows you to freely move

The front pivoting wheels guarantee maximum machine maneuverability

The spiral hose connects the machine to the nozzle. Thanks to its spiral shape, when stored it is very compact. Nevertheless, during use it can extend up to 3 m to reach spaces that otherwise could be difficult to work

24 V

KSANEX

Sanitize anywhere with the battery version

It allows you to move freely even in places where there's not a power outlet nearby, for example in large conference rooms or cinemas, to let you disinfect armchairs, or outside, to disinfect the outdoor entrance area of shops, pharmacies, supermarkets or

restaurants. The battery-operated version of KSANEX also makes it easier to sanitize inside means of transport such as buses, trains or subways.

HOURLMETER

To keep under control the actual working hours

BATTERY VERSION

The battery-powered version is equipped with 2 batteries of 12 V and can work up to 2 hours continuously

ADJUSTABLE HANDLE

The height-adjustable front handle makes it easy to move around and allows you to carry the machine comfortably like a trolley and sanitize while on the move.

ON-BOARD BATTERY CHARGER

It makes easier charging

STANDARD EQUIPMENT	KSANEX	KSANEX B
Ergonomic dispensing nozzle	•	•
Extendable spiral hose	•	•
Front pivoting wheels	•	•
Comfortable gun holder hook	•	•
Power cable	•	•
AGM batteries 12 V (2)	-	•
On-board battery charger	-	•
