 **FIMAP®**

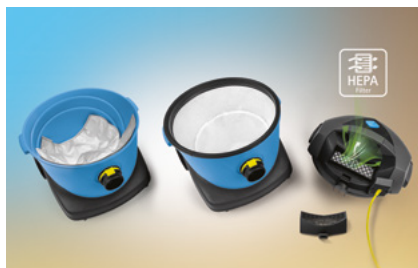

FV15.1

Fimap's **FV15.1** is a 15-litre professional vacuum cleaner that delivers in its small size great performance and reliability. The polypropylene tank and special design highlight its robustness and resistance to the intensive and frequent use of the professional sector. It features a built-in accessory holder for storing the standard set of nozzles, a triple filtration system to effectively trap dirt and return clean air, and a telescopic tube to prevent fatigue during use.

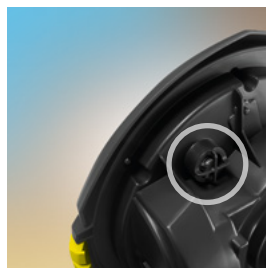

DESIGN

The body is robust, impact-resistant and protects the furniture, as it does not leave marks on it in the event of contact. The telescopic tube can be extended up to 90 cm with a locking mechanism, so that the operator can find the most comfortable position to work without straining the back.

3-LEVEL FILTRATION

As it enters, the air immediately passes through the **microfibre bag filter**, which performs the first level of cleaning by trapping dust. It continues on to the **polyester prefilter**, which protects the motor and increases its reliability over time. Finally, the air passes through the **HEPA filter**, which captures fine dust so that the air returning to the outside is clean and safe, for the operator and for other people in the environment where the cleaning task is carried out.

SAFETY VALVE

It protects the motor by preventing it from working in critical conditions that would cause overheating, such as when the vacuum tube is clogged, thus preserving its functionality and durability.

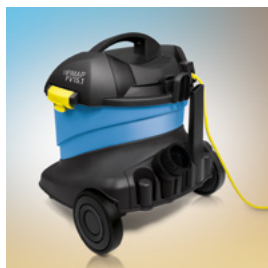

CONVENIENT TO USE

The two large rear wheels provide stability during transfer, while the pivoting front wheels enable the FV15.1 to smoothly follow all the operator's movements during the cleaning process.

CABLE WITH QUICK-CHANGE SYSTEM

Thanks to the quick-change system, in the event of a breakage the cable can be easily removed and replaced without the need for a technician, thus avoiding unnecessary costs and loss of time.

ACCESSORY HOLDER

As it is built into the body of the vacuum cleaner, it keeps the nozzles organised and always within reach. It prevents them from being left out of place and lost.

TECHNICAL DATA		FV15.1
Type of dirt		dust
Tank material		plastic
Motors		1
Stages		1
Suction motor power	W	800
Vacuum	kPa	20,2
Air flow	l/s	35
Tank volume	l	15
Power supply*	V/Hz	220-240/50-60
Sound pressure level (ISO 11201 – LpA)	dB (A)	76
Cable length	m	10
Weight	kg	7,9
Machine dimensions (L x h x w)	mm	377 x 418 x 392

* V/Hz 115/60 is also available

STANDARD EQUIPMENT

ACCESSORY KIT Ø35

Standard accessories include:

- telescopic chrome-plated steel tube
- hose
- hard floor nozzle with bristles
- crevice nozzle
- suction brush
- accessory holder
- microfibre bag filter
- polyester prefilter
- HEPA air outlet filter
- 10-metre high visibility yellow cable.

OPTIONAL

A 15-metre cable is also available upon request to increase the working radius.

NOZZLE WITH BRISTLES

With a width of 35 cm, it offers a wide vacuum coverage increasing productivity.
